Proxima Software releases FontExpert 2011 Version 11.0 Font Manager for Windows

FontExpert 2011 version 11.0 is new release incorporating many improvements, new features, and fixes.

November 7, 2011 - Proxima Software today has announced the release of FontExpert 2011 version 11.0 font manager for Windows.

This release incorporates many new enhancements including:

- Support to multiline face sample text in the Main view;
- Support to Unicode-named fonts;
- Option to turn off info-tips in the Main view;
- "Full Name" property of Type 1 fonts in Properties view;
- Database Search - search by Caption;
- Backup - the backup file now can exceed 4 GB;
- Other enhancements.

The complete list and description of new features can be found in the release notes for the product, found on the company's website, www.proximasoftware.com/fontexpert.

About Proxima Software
