Proxima Software releases FontExpert 2018 Version 15.0 Font Manager for Windows

FontExpert 2018 version 15.0 is new release incorporating many improvements, new features, and fixes.

February 16, 2018 - Proxima Software today has announced the release of FontExpert 2018 version 15.0 font manager for Windows.

This release incorporates many new enhancements including:

- My Collections, copy/paste/drag/drop between Groups, Library, and My Collections.
- Search became a dockable view and finds fonts in Library and My Collections.
- Search for untagged fonts and search for fonts without caption.
- Export Groups to a folder structure.
- Preview of OpenType variable fonts.
- Text sample and Characters Map now display only symbols defined in a font.
- “My Text Sample” now has an edit box for typing sample text.
- Improved overall performance.
- Fixed slow preview of Type 1 fonts in Windows 10.
- Other enhancements and fixes.

The complete list and description of new features can be found in the release notes for the product, found on the company’s website, www.proximasoftware.com/fontexpert.
